AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

- (Previously presented) A medical device comprising permeable, porous expanded
 polytetrafluoroethylene tube having a microstructure of nodes interconnected by fibrils and provided
 with a non-porous coating over the porous expanded polytetrafluoroethylene to render the tube nonporous, wherein said tube is configured as an inflatable balloon.
- (Previously presented) A medical device according to claim 1 wherein the non-porous coating comprises fluorinated ethylene propylene.
- (Previously presented) A medical device according to claim 1 wherein the non-porous coating comprises an adhesive.
- (Previously presented) A medical device according to claim 3 wherein the adhesive comprises a thermoplastic adhesive.
- (Previously presented) A medical device according to claim 4 wherein the thermoplastic adhesive is a thermoplastic fluoropolymer.
- (Previously presented) A medical device according to claim 1 wherein the porous expanded polytetrafluoroethylene comprises multiple layers.
- (Previously presented) A medical device according to claim 1 wherein the balloon is an inelastic balloon.
- (Previously presented) A medical device according to claim 1 wherein balloon comprises a
 portion of a balloon catheter.
- (Previously presented) A medical device according to claim 1 wherein the non-porous coating is a continuous coating.
- 10. (Canceled)

S.N. 09/510.937

(Previously presented) A medical device comprising a tube having a node and fibril
microstructure, the tube being non-porous and configured as an inflatable balloon, wherein the tube
includes a non-porous coating.

 (Previously presented) A medical device according to claim 11 wherein the non-porous coating comprises fluorinated ethylene propylene.

 (Previously presented) A medical device according to claim 11 wherein the non-porous coating comprises an adhesive.

14. (Previously presented) A medical device according to claim 13 wherein the adhesive comprises a thermoplastic adhesive.

 (Previously presented) A medical device according to claim 14 wherein the thermoplastic adhesive is a thermoplastic fluoropolymer.

 (Previously presented) A medical device according to claim 11 wherein the tube comprises porous expanded polytetrafluoroethylene.

17. (Previously presented) A medical device according to claim 16 wherein the tube comprises multiple layers of porous expanded polytetrafluoroethylene.

18. (Previously presented) A medical device according to claim 11 wherein the balloon is an inelastic balloon.

19. (Previously presented) A medical device according to claim 11 wherein the balloon comprises a portion of a balloon catheter.

 (Previously presented) A medical device according to claim 11 wherein the non-porous tube has a continuous coating.

Claims 21 - 28 (Canceled)
